Customer Reviews

So, the idea of using fba was presented to me about a week ago. I don't know anyone that is doing this and have never even heard of it. So of course I needed the "411" on how to get started, and useful tips and tools. This short but very informative book gave me just that! With website links, pictures, honesty and a little humor :) . I was left scratching my head with wonders of so many possibilities that I wouldn't have even dreamed of. Please don't read this just once and say hmmm what the heck is he talking about. Read it a second time, explore the links and spend time on the sites recommended. I think I just found my first product. Now let the research begin!!!!!!

I really liked the way the author wrote this book. He goes right to the point of the subject. I don't need to know some one's whole life story. I just need to know the steps and then how to execute them.

I enjoyed this book. It was easy to understand, and the author speaks in a professional yet informal manner. He teaches you how to utilize SEO or Youtube to help guide more traffic to your products; Hopefully to provide more revenue! This book was a quick read. It provided links and screen shots to help guide you through setting up an account and a few other options!! highly recommend this book for someone just starting off on .

Very poor quality indeed - no substance, obviously cobbled together in under an hour, and on top of all that the grammar is awful. There are a lot of very brief, quickly compiled books on FBA and this is no exception, but most of the others are of a far higher quality than this. Don't waste your cash.

In fairness I purchased this because it would be a quick read. Not in depth, nothing earth shattering either but a solid bit of consolidated knowledge. Worth the read and worth the price if this is a road you are considering traveling.

No nonsense, right to the point. Quick read. Lots of valuable information if you want to sell and make some serious money on FBA. This guy knows what he's doing and doesn't just tell you what you want to hear. Get it. Read it. And go on vacation!

Seriously, the name Red Mikhail has to be a disposable pen name for this drive-by shooting! No

legitimate author/writer would use their REAL name on a product like this and expect to remain in business! This is probably one in a very short series of "slapped together" publications from this author written only to get a buyer's money and run. This author is probably using one of the techniques recommended in this publication - Buying Reviews! Can't imagine ANYONE giving this publication Two Stars or more unless they have been paid to do so. Stay far, far, far, far away from this author.

This book is easy to read and contains useful knowledge for one who has no clue where to begin with FBA. I look forward to testing out some of these tactics especially the SEO info (good to know for any business).
