Synopsis

A lot of people have misguided views on the hemp plant. These misguided views deal with people associating the hemp plant with its sister plant, which is known to get people high. The hemp plant is unable to get a person high and has what seems to be an infinite amount of uses. Yes, hemp could even fuel a diesel engine. Burning plants to fuel our cars without any toxic footprint? Yes, please. Find out many more beneficial uses of the plant and how it can change the very way each being lives on this plant. I have a bachelor's degree in business administration from Tiffin University and an associate's degree in management technology from Owens Community College.
