# Urban Gardening: How To Grow Food Opportunities And Hope

## Synopsis

**Urban Gardening - Renewal neighborhood program** You see, the problem in most urban communities is a lack of economic opportunity and a lack of sustainable jobs. Change makers, like yourself, are asking the important question of how to bring economic transformation to the inner city. Fortunately, the answer comes in the form of sustainable local foods. By listening to this book, heart-centered individuals and business owners will discover that healthy food production is the solution for effective urban renewal. You will learn how to grow healthy foods through the process of hydroponics, so that foods are made available 24 hours a day and 365 days a year versus the seasonal efforts of many urban agriculturalists. Because of urban hydroponics, you will discover the secret of how to drastically reduce the rise of obesity, so that individuals will become healthy in our urban areas.

**Economic Empowerment** This material will also show how to create sustainable jobs in the healthy foods industry, so that individuals will no longer be unemployed. You will discover how to implement a long-term economic strategy that is all inclusive, so that everyone will benefit. I will teach you and your team of social entrepreneurs how to repurpose empty buildings in the inner-city, so that food growing units can be placed accordingly. This information will give you tips on how to create a "community of partners", so that a local movement can be established. You will also learn how to re-do empty greenhouses, so that they become affordable and energy efficient. I am going to teach you how to help raise up a new generation of "urban farmers", so that young people will have an alternative career path!

**Entrepreneurship** Finally, I am going to show you how to build a multi-million dollar "green business", so that you will never have to worry about money again!

**Starting a Movement** If after listening to this book you decide to join our "local foods movement", we can show you how to.

## Book Information

## Customer Reviews

You can get this info from a google search. Don't bother spending money on it.

Thank you Dr. James for your insight into Urban renewal. Information like this is needed all over the country especially as we think of solutions to the urban plight. This book is a must have in any conversation on ways to revitalize our cities, build stable and lasting business within city limits and get our youth involved in the process.

I am a huge advocate for eating to live instead of living to eat. Fresh produce and its availability make a huge difference in the health of our communities. Urban gardening is a concept that contributes to renewal in the inner city and I love that this book has informed us how to create this renewal cycle and sustain it.

This read is a clear path to economic empowerment. Step by step instruction to secure a self made and sustainable future...
