I highly recommend this work for anyone looking to improve the work they do in service or information industries. As corporate counsel for an education management organization, I do a good deal of work with school districts as well as legal departments. I have yet to see one that wouldn't benefit from The Complete Lean Enterprise. For non-traditional environments such as legal departments and school districts looking to benefit from proven lean practices, this book should be mandatory reading.

This book was a book required for me to read for a class. However it has proven to be a book that I can easily reference later. The layout of the book has been done well and there is useful info on every page. This it isn't full of that bla bla bla and is probably why it is a short book.

I was taught how to do value stream mapping by Beau and Drew and have continued to learn from them through their workshops and blogs. They are both committed to improving this valuable tool, and this book summarizes many of their recent upgrades. I recently had a couple of opportunities to try out the "chunking down" technique described in Chapter 7 and found it to be a real breakthrough. I also think that all managers should read the section in Chapter 10 about the "humble inquiry" approach to management. This book is full of similar nuggets that you can use right away.
