Customer Reviews

I'll start off by stating that I don't think I'm the intended target audience for The Career Playbook "not completely, anyway. While I could be considered a young professional, I felt that this was geared more towards students who are graduating from college (whereas I currently have 3 degrees and will be finishing up my 4th). The book is divided into 3 sections: Part 1: How Careers Really Work In this section, the author discusses how to think about your career, and how money, meaning, networks, and relationships, play into that. The three broad factors to consider when you're trying to figure out whether or not a job is a good fit for you: job satisfaction, compensation, lifestyle. He's very realistic with his advice, and he makes it clear that you most likely won't achieve the best in all 3 categories right at the very start. These things take time to cultivate. He also provides ideas for things you can do in order to incorporate your passions while still being realistic. Part 2: How to Get the Job I loved this section, as this is what I'm working on right now (anyone wanna read my personal statement/CV!?)! The part on landing interviews/the art of interviews will definitely prove to be invaluable for me later on this year! :] The "You've Studied Liberal Arts, Now What?" section intrigued me, because one of my majors in college was Music Performance. I could definitely relate to what the author was talking about. Part 3: How To Thrive The author talks about how to get off on the right foot at your new job, how to be an inspiring leader, and cultivate a mentor.
