ZYDELIG (Idelalisib): Treats Cancer, Including Chronic Lymphocytic Leukemia (CLL), Follicular B-Cell Non-Hodgkin Lymphoma (FL), And Small Lymphocytic Lymphoma (SLL)

Synopsis

Although, your health condition may impact your everyday life, do not let it define who you are. • ZYDELIG (idelalisib) is used along with another medication, rituximab (Rituxan), to treat chronic lymphocytic leukemia (CLL; a type of cancer that begins in the white blood cells). It is also used to treat certain types of non-Hodgkin's lymphoma (NHL; a type of cancer that begins in a type of white blood cells that normally fights infection) and small lymphocytic lymphoma (SLL) in patients who have received other treatments. Idelalisib is in a class of medications called kinase inhibitors. It works by blocking the action of the abnormal protein that signals cancer cells to multiply. This helps stop the spread of cancer cells. This medicine is available only with your doctor's prescription.

Thanks and may you have a good understanding about this drug. "ZYDELIG (idelalisib). You may want to share this book with your family and friends who may be in need of help and would want to use this medicine. Take care, and as always, be well!
