Wicca Herbal Magic: A Beginner's Guide To Practicing Wiccan Herbal Magic, With Simple Herb Spells

Synopsis

Would you like to enrich your life by tapping into the magical properties of the plant life that surrounds us all? If you answered "yes", you're in the right place. Thanks to the increasing popularity of Wicca, there has been a resurgence in interest in herb magic. With all of the readily available herbs - either store bought, grown, or foraged - herbal magic is one of the most accessible forms of magic of all, not to mention one of the most effective! If you're looking to start practicing Wicca or witchcraft (or you want to practice spell work under a completely different umbrella!), herbal magic is one of the best starting points. **Magical Properties of Herbs** Going right back to the earliest recorded history, the healers, shamans, and other medicine men and women of the "old days" understood that herbs are useful for more than just nutrition and physical cures. But throughout history and across continents, all societies had working relationships with herbs and their magical properties. When you think about it, it's little surprise that herbs are among the most powerful tools of magic. After all, plants embody the power of the four classical elements working together to create and sustain life - Earth (the soil), fire (the sun), air (oxygen), and water (well, plants do need water!). Of course, not all herbs have the same magical properties. Some herbs, like lavender and cinnamon, are primarily used for matters of the heart. Others, including basil and sage, are called upon for protection spells. Throughout this book, you'll learn about the magical properties of some of the most popular herbs, enabling you to use them effectively during spell work.

Customer Reviews

In this simple yet very informative book Lisa Chamberlain brings key elements of introducing the beginner Wiccan an introduction of using herbs in their magickal spells. Lisa starts her book on a brief description of history of how the ancient people used herbs in their everyday life. She gives a brief but strong overview of The Power Of Correspondences in conjunction with the magickal system of the plant kingdom. She explains in a direct forward way of how the universe, plants and the four elements are interconnected with each other. Lisa explains The Doctrine Of Signature candidly of how the every plant is useful humans and the very fact that humans need plants to survive. Plants have a resemblance to the human body and it's medicinal benefits will correspond with the the ailing part of the body and it's use for healing that part of the body. Interestingly she writes how certain plants used for medicinal purposes look exactly like the part of the body that needs to be healed. Lisa eases the beginner witch with thirteen herbs that are the most used by the witch. She gives the description, magickal correspondences, and the magickal associations of the herb, which includes the zodiac sign, planet , element and deity of which was they're desired herb. Included in her book Lisa gives the reader recipes for magickal spell casting teas, baths, oils and a few other items. Lisa brilliantly executed a very interesting, informative easy to understand and use beginner guide to herb magic...A must read for those who are starting out in the magickal world of herbs..Great Job Lisa!:)

What a great book. I learned a few things that seemed so simple when I read them.... I use herbs everyday for many purposes and grow a lot both for ceremonies and the cooking.....This book recharged my passion for herbs, their history, usage and beauty and importance in our everyday lives. I love ElfwortThanks Lisa...another great installment.

This is a useful guide for getting started with using plants for magical purposes or just better connecting to their energies. This provides a broad range of uses from culinary to oils, teas, smudging and baths. This is not meant to be a comprehensive resource, just a basic guide.

I received a free copy of this book in exchange for an honest review, and I quite enjoyed reading this book. It includes information about 13 major herbs - as well as a Table of Correspondence, how to do an energetic clearing, smudging & purification AND a suggested reading list!

This book covers, in more detail than most, all the beginning uses of herbs in ritual. The author adds historical uses as well as today's most common uses for 10 different plants, then goes on to explain how teas made from these herbs are used in magic. She also covers bathing with magical herbs and other easy and common experiences where herbs are most called for. This is an excellent book, ranking with her book on crystals and stones for utility.

This is a starter guide for herbal work. It begins with a small history of herbal use in the past. Then, it provides short discussions on 13 herbs and how they have been used in the past and can be used currently. Next is a discussion on how to create your own magical garden and several tea recipes and spells.

As with all the other books by Lisa Chamberlain, this is a fantastic book for both beginners and those with more experience in herbal magic. I highly recommend this book.

Love this simple and charming book! Its useful for a beginner and still not too basic for a more advanced reader. Lots of helpful detailed information. Very inspired and can't wait to plant my own garden!
