Synopsis

For courses in maternal-child nursing, care of women and children, and women's health, for both 4-year BSN-level courses and selected ADN-level (2-year) programs. A humanistic, holistic approach to thinking like a nurse. *Olds's Maternal-Newborn Nursing & Women's Health: Across the Lifespan* is a family-focused text that covers maternal-newborn nursing and women's health topics with special attention to evidence-based practice, cultural competence, critical thinking, professionalism, patient education, and home/community care. Relatable and engaging, the text is built upon the philosophy that pregnancy and birth are normal life processes, and that family members are partners in care. The holistic approach helps readers develop their clinical-reasoning skills, and prepare to practice nursing in an ever-changing healthcare environment. Also available with MyNursingLab®. This title is also available with MyNursingLab™ an online homework, tutorial, and assessment program designed to engage students in the Maternal/Newborn Nursing course and improve results. Got this for the fall semester. Haven't looked all the way through it, but it is easy to read.
