Micro Shelters by Derek "Deek" Diedricksen is a beautifully written book as the author has compiled a series of tiny shelters showing how living tiny means living big when it comes to style. Diedricksen starts his book with a sensible disclaimer that says something to the effect of using proper safety precautions and to follow building codes. His book then offers the following sections:
*Amazing Microshelters
*Tools and Materials
*Plans to Inspire
The section on microshelters features different tiny house styles. Inside this chapter you will see photos and general layouts for some of the following plans:
*Matt Wolpe's Tiny House (It's a 100 square with a floor plan shown)
*Little Yellow (it's a 120 square feet and a floor plan is shown)
*The 227 (It's 227 square feet with a floor plan

shown) The section on Backyard Cabins, Camps & Hideaways features some of the following house styles:
*The Transforming A-Frame (It's 80 square feet)
*The Writer's Haven (It's 132 square feet)
*Dianne and Bill's Place (It's 108 square feet)
*The Miner's Shelter (45 square feet plus 100 feet exterior)
Another section of Micro Shelters focuses on micro shelters on wheels. Within in this section you will find some of the following shelters:
*The Cub (40 square feet and can be towed using a Chrysler minivan)
*The Mighty Micro House (It's 136 square feet)
*Henrietta (It's 26 square feet)
You will also find a section showing different playhouses and the like. Inside this section some of the ideas I liked included:
*The Book Nook
*The Nisker Nook
At the end of the book you will find six floor plans from "the masters".
