## Customer Reviews

I might have missed something. Is this a childrenâ™s book? I read some of the good reviews before I bought this book, and wow, was I disappointed! What were these people thinking? The bookâ™s

cover touts à œThe missing tech behind the worldâ™s greatest structuresâ•. Well there is missing tech, but you wonâ™t find the answer to the missing tech here. This book is 84 pages. It could have been published in 24 pages if they hadnâ™t printed it in 18 pt. font. It can be read in thirty to forty-five minutes, tops. Itâ™s written at a 5th grade level (2nd grade in Japan, Korea, or China) and it reads like a high school paper. The editing is poor at best. There are missing words, incomplete sentences, and words run together. All that being said I gave it two stars because it has several good points, and I couldnâ™t give it one and a half stars. The book covers the mysteries of: The great Pyramid of Giza, Stonehenge, Goseck Henge, Derinkuyu Underground City, Pumapunku, Gobekli Tepe, Nan Madol, Hypogeum of Hal-Saflieni, Coral Castle and the Russian Megalithic Stones. There is very little new here and the reader could get more information on most of these enigmas by watching a few episodes of à œAncient Aliensâ•. Whole books could/have been written each of these enigmas, yet the author devotes six to eight pages to each of them. The à œchapterâ• on Coral Castle is interesting, only that there are several inaccuracies in it. I live within two hourâ™s drive of Coral Castle, have visited it several times, which the author obviously hasnâ™t, and I am very familiar with it. What this book overlooks is that Edward Leedskalnin not only built Coral Castle, he moved it to its present location from its original location further south.
