Â A patient-centered approach to pharmacology Pharmacology: Connections to Nursing Practice tightly links pharmacology to nursing practice and patient care, recognizing that for nurses, pharmacology is not an abstract academic discipline but rather a critical tool to prevent disease and promote healing and wellness. It offers unsurpassed features designed to illuminate connections between pharmacology and practice, from patient scenarios and practice applications to coverage of lifespan considerations, patient education, alternative therapies, and gender/cultural influences. Learning is simplified through the use of prototype drugs, as well as outstanding full-color illustrations. Organization by body systems (units) and diseases (chapters) places the drugs in context with how they are used therapeutically and connects pharmacology and pathophysiology to nursing care. The Third Edition covers 25 new medications approved by the FDA since the previous edition, a new chapter on Individual Variations in Drug Responses, and updated review questions that better prepare students for exams.

Customer Reviews

Used it for a RN to BSN program. Sadly, I wish this book was ordered for my pre-licensure program because it is an excellent textbook. Its quite large as there is obviously a lot of material to cover, but I find the chapters are very manageable. Very few chapters are greater than 20 pages and many are actually 10-15 pages or less. Within each chapter, the material is presented in a very concise yet robust manner. It reads very easily. I still remember my pre-licensure program pharm textbook. It was horrible - needlessly long chapters, disjointed presentation of material within chapters, etc.

This book is actually really good. They make sure you get the concept of whatever the topic is by repeatin it over and over again.

Book came as described.

Book is how it's supposed to be but shipment was sooooo slow...

Was brand new and I had no problems received promptly!

Book came in perfect condition.

bought a brand new book, and it came with knicks and scratches :(

Exactly what I was looking for!
