Customer Reviews

This map is in fact a good map of Pennsylvania; however, half of the state is on the front side and the other half is on the back. I had intended to hang this on my wall and map out various locations throughout PA for reference but, unfortunately, this map is absolutely useless for that purpose. I gave it three stars because it had all of the information that I feel a decent map should have. I didn't give it five for the poor choice of splitting the state into two distinct sections.

Rand McNally knows how to do maps right and their Pennsylvania map is no exception. This map is a great if you need a road map of Pennsylvania. Half the state is on one side of the map and the rest is on the other side. Of course, this can be a pain if you are visiting areas that are right in the division area. The map is old style. It's a huge fold out map that is bulky when opened in full. Of course, those are downsides of any large folded paper map. There are detailed maps of several large Pennsylvania cities which are helpful but would not give a great deal of detail if driving in those cities. We all know how large paper maps can be hard to fold back and that they often wear quickly when used but that is the fun of old style road maps. The RAND MCNALLY PENNSYLVANIA map is an excellent choice if you need a large picture of the beautiful state of Pennsylvania--where cities are located and distances. Many points of interest are shown on the map that are outside the major cities and are more isolated, such as Frank Lloyd Wright's famous FALLINGWATER. This is an excellent map to get you from city to city in Pennsylvania. A more detailed map would be needed for specific cities but here is a great overview of Pennsylvania.

I recently moved to South Central PA and bought this map thinking I could hang it up so that I could see how to get around the local area. I had the same problem as another reviewer - my house is in the lower left hand corner of the map and half of the area I live in is on the flip side. I can't use it the way I had planned. I can only see the vicinity to the east and north of my home if I hang it up. It's fine for in the car but not for hanging or mounting.

I used this map for a craft project and the paper is actually too thin for that. It tore a little when I tried to decoupage with it. As a map on its own it's okay, even for its intended purpose the weight of the paper could have been more substantial.

As a teacher, this map is not helpful for display. The map is divided by east/west on different sides. Thumbs down to RM for this map. If you want a good detail map, buy a Gazetteer, which breaks the state into grid sections.

Had some difficulty finding a detailed & comprehensive map of Pennsylvania in stores or through the local AAA office. This map is exactly what I was looking for!

I bought this as a going away present for a friend moving to Pennsylvania. I know for sure it will be used, treasured, and depended upon for some time after all the other going away presents have

been shoved into the top shelf in the coat closet or stored in a box in the basement.

excellent quality map...was given as a Christmas present and the recipient loved it! very satisfied customer and will order again.
