Customer Reviews

Ok, so the content of these flashcards is outstanding and I have heard nothing but rave reviews from everyone who I know who has used any of the Davies products to pass the ultrasound RDMS vascular technology exam. HOWEVER, I do not understand how these can even be called flash CARDS. The design is absolutely horrible. They are sheets of regular paper. Not at all what I would expect when I order flash cards - ie you would think they would be at least a bit sturdier than regular paper!!!! When you flip through them, since they are paper, they don't even flip properly and the holes are tiny so you have to wiggle and finagle each on to get on to the next one. I'm sure within a few days of studying, they are going to be a ripped mess. Very disappointing that for \$60, they can't provide you with something a little more sturdy, you know, that resembles what you think of as

flashcards. I can't bring myself to give less than a 4 star because I don't the content is quality, but geeeeezzzzzzzzz Davies publishers - come on!!!!

It helped me review major anatomy and pathology dealing with Vascular. I would definitely give it a thumbs up for a great ultrasound resource.
