Customer Reviews

I am a seasoned photographer with a vast knowledge of what makes a good image. All the images in this collection meet the criteria, well composed, accurately exposed and expertly processed. I recommend this book to photographers of all skill levels.

Four hundred large, thick pages with wonderful images depicting light. I wasn't sure that I would like it, but I DO. Very Much. There is a great deal of magic in these pages. Often there are a few words from the photographer or the writer about why and how and always there is thought and information about the subject matter. The book inspires - I feel privileged to own this book.

Super clear and colorful photos! Acceptable size and price. Absolutely no complain about it. The product from National Geography is quality-guaranteed !

Not sure how this got so many great reviews. The book is really, really small. The photo's are cool, but some of them are cut in half, taking up 2 pages, which detracts from the photo. This is way over priced for what it is and I wish I would have returned it.

Purchased as a gift for a photographer. She loved it and has spent many hours going through it. Very interesting how they traveled the world by traveling the day; neat concept. Wish I'd bought a second copy for my coffee table.

Book shipped quickly and product quality met all expectations.. Only disappointment was that I didn't realize it was a small book and I expected a larger-sized book.. I would use this seller again and recommend to friends

A perfect gift! I would say the gift was a great surprise. And suitable for the person who is interested in and loves taking photos. I learned that according to the smile on face of my presentee and eyes with his interest during the looking into'

another great book from National Geographic. I could spend a ton on their books, but I only have so much room on the coffee table and the shelves. I really like this book as it seems to capture a moment in time during one single day from sunup to sundown.
