This is a detailed and beautiful book on collagraphy. If you like stitching and fabric manipulation and print making this is the book for you! One of the funnest new techniques is that you can use your car as printing press! How fun is that! Another great page features a chart showing the best techniques to use with which materials. This is especially useful when working with a variety of materials.

This is a nice book. Lots of ideas. I've never used a car to do printing before. The examples in this book are not done in a style that I admire but she has lots of them. I did learn some new things. It is a collection of several processes in one place and that's a good thing.

lovely addition to my library!
