Customer Reviews

The quality of paper used for this textbook is worse than some paperback books. It is in black and white when it seems like some parts should be in color. The ink seems to bleed through the back side of a page. I can't believe I paid the full price \$290 for this brand new textbook which was sold and fulfilled by .com to have it come in this condition. It makes me wonder if this is a counterfeit version.

Book was torn when it was received but is ok
