How To Start A Trading Business With \$500

Synopsis

How to start a Trading Business with \$500 Many new traders have little capital available in the beginning, but this is not an obstacle to starting a trading career anyway. However, this book is not about how to grow a \$500 account into a \$500,000 account. It is precisely these exaggerated return expectations that bring most beginners to failure. Instead, the author shows, in a realistic way, how you can become a full-time trader in spite of limited start-up capital. This applies both for traders who want to remain private, as well as for those who want to eventually trade customer funds. This book shows step by step how to do it. In addition, there is a concrete action plan for each step.

Anyone can be a trader in principle, if he or she is willing to learn how this business works. Contents

1. How to Become a Trader with only \$500 at Your Stake?
2. How to Acquire Good Trading Habits?
3. How to Become a Disciplined Trader

Customer Reviews

Peter Devaere is passionate about trading. And he likes to share his tips and tricks in different ways (ebooks, website, seminars, ...). Based on his personal experience and his teachings he knows that, for someone trying to find out his way in this business, it is better to start trading rather quickly with a small, real money account (instead of paper trading) trying out a lot of transactions. This way good trading habits and discipline can be focused upon. A special chapter is completely devoted to social trading : an opportunity to establish a track record and a real time test.

I have recently read a lot of book on trading, specifically day trading. So I need one that gives me a breakdown with specific figures. So when I saw this I thought; why not. Letâ™s see what I can learn from the author. Wesley Smith focusses on starting small and being focused on learning to be a good trader rather than wanting to get rich quick as there is no such thing. Wanting to get rich with actually working is a myth that doesnâ™t exist in this world. Most successful people worked hard to be who they are today. Of you want to start day trading then I highly recommend this book. The author takes a different turn into teaching you step by step how you can actually become a good trader before throwing in large investments and ultimately losing all your money.

A lot of advice and tips reminding new and current traders that you must start from square one and learn/grow to a better professional trader. This is done by tracking your trading through journals in his books. I have read all of them....you should too.

This book contains How to Become a Trader with only \$500 at Your Stake?, How to Acquire Good Trading Habits?, How to Become a Disciplined Trader, The Fairy Tale of Compound Interest and so much more. If you're thinking about buying this book, JUST DO IT. You will not regret it! Great writing, stimulating encounters and this book was done before I knew it.

As a somewhat new day trader in Forex,. I look at price action, as does the Heiken Ashi Trader, and I have read many books on trading. This little book, and his others which form a series, contain much wisdom and practical advice and have been valuable to me. I recommend it..

Iâ™m not really into trading but this book is quite an interesting read. I actually learned a lot from this book, itâ™s inspiring every reader with trading that certain kind of amount. To those who are new to trading business, you can read this book to give you an idea of this kind of business.

With \$500.00 it is hit or miss. They tell you to make a pick and go with it and if it is making money let it run and if it is not then sell and close out. \$500.00 will not last long enough to make any money.

Yes there is a certain amount of extraneous "fluff" as with almost all books and videos on trading. The 5 star Chapter has first class advice on trading times and Stops. That alone makes this publication a buy and a How to Start a Trading Business with \$500 must have for anyone struggling against accumulated losses. I followed the advice and my trading has a new confidence.
