Customer Reviews

This is a short and basic introduction to sculpting, mold making, and painting a vinyl toy. It is more inspiration than instruction but gives you enough information to get started and let's you work out the rest. The book could have benefitted from just a little more depth on why the author gives you the instructions he does, but that does not detract from the value of the book as-is.

Jay has a funny and down to earth way of teaching the art of making your own toys. He explains everything clearly and concisely, this book and his Youtube videos were, and still are, a go to reference when I need some help with casting my own charms and characters.

jay moores is the man. ive been casting resin for about a year and jay got me started. concise. everything u need to jump in resin casting. jays own pieces offer plenty of inspiration and he lays out all the groundwork for the perspiration part. check it out!

Nice introduction to mold-making and casting though you can find the same and more information by searching YouTube, blogs and forums.
