## **Customer Reviews**

Really nice easy read outline to help study for the TEAS exam. It was a big help with its direct to the point definitions and facts. I used it as a base study guide while using the Secrets of the TEAS V study guide for more in depth information and did really well on my exam. Good luck to everyone taking their exam!

Did anyone else notice that in the photo, under Subtraction, it shows that  $3-8=-3$ . Correct me if I am wrong but this should be  $-5$ ... Not sure how to trust a product that can't get that simple math problem correct.

Using this was a little harder than what I was expecting but it does give a really clear visual of what is expected on this test. It is a complete basic review of what was on the test. I have to retake the test to help my scores and will continue using this to study.

This is a great supplement to a proper study guide, but it should not be your only method of studying. There is one error I caught so far which is under the subtraction section,  $3-8=-5$  the study guide has the answer as 3. So this simple error should be fixed

Nice, quick, simple, easy guide. I love this because when I'm out running errands, I can slip it in my purse & review things. Lot's of detail packed in. Don't recommend it as your ONLY study guideâ€¢ but, I feel its helping.

Thank You!!! It sums up the sections of the main subjects on the TEAS V exam. It does not cover all information that may be on the exam but it does highlight very important information. It is an add on to your TEAS V study guide or whatever studying material you plan on reviewing for the exam.

This gives you the must know and kind of refresher on all the topics covered. Kind of like a cheat sheet and laminated so you dont have to worry about it being torn etc. This shouldnt be your only study guide or material, this should be a side supplement to make sure the items you studied you reinforced. Or even if your out or somewhere and can sneak this in, its good refresher

Very helpful in each subject. Less reading and more to ppint to understand.
