## Customer Reviews

Excellent of course but we used this at work and I'm well familiar with this. I'm more comfortable with Optum products anyway and will always buy their products for work. I use this everyday to assist me in coding, a resource I wouldn't do without.

Although it does not replace the AMA issued CPT book, it is a great supplement. I keep it at my desk for clarifying those procedures that I don't encounter very often. ED coding means you do have a variety of procedures and our ER seems to be doing more things right in the ED instead of transferring them to amb surg if they can.

A must have for coders that apply CPT codes for physician services and facility coding

Comes in very handy when coding very intricate procedures.

I don't know what I would do without this book!

Love it and looking forward to the 2016 CDR

Couldn't code without it

Definitely use this if you want help with CPT coding!!!
